Good day Ms. Janice Palima,

I hope you are doing well. I would like to formally request access to a client list linked to your sales data, specifically including the following details: institution name, institution type (e.g., Government Hospital, Private Hospital, RHU, Clinic, Pharmacy, LGU, NGO), and corresponding province and city or municipality. Ideally, these should be mapped to DR numbers or aligned with area or territory classifications from the dataset you previously provided.

In addition, we would like to request a more detailed breakdown of location-based entries similar to the structure reflected in our reference. You may kindly refer to the attached image that we will be sending, which illustrates the format and level of detail needed. This includes the frequency or count of entries per location across different years, along with their corresponding categorization (e.g., high volume, moderate, or low).

This dataset will be used strictly for academic and analytical purposes as part of our project. To ensure confidentiality and proper data handling, we are fully prepared to provide and sign a Non-Disclosure Agreement prior to receiving any information.

Thank you very much for your time and consideration.

Respectfully,
Keith San Miguel
